

STATISTICAL REPORT
ON
FOREIGN ASSISTANCE AND LOANS TO KOREA
(1945-75)

Suk Tai Suh
Monograph 7602

September 1976

Korea Development Institute

ACKNOWLEDGEMENT

The statistical data prepared in this report covers all the official foreign economic aid and foreign capital inflow to Korea for the period of 1945 to 1975. It is designed to provide a statistical reference for the Korea Modernization Study (1945-75), a joint research project for Korea Development Institute and Harvard Institute of International Development, as well as for researchers outside the project.

We hope that the present report provides helpful reference and by far the most accurate information on foreign capital transfer into Korea although we do not claim that accuracy in the data in this report is indisputable. In the meantime we will continue our efforts to revise the data as the new and correct source becomes available. The sheer time span of 30 years which this report covers merely suggests that a report encompassing such a lengthy period of major significance cannot be a satisfactory one unless the data compilation process is aided by a considerable amount of professional assistances from all the related organizations.

Thus, this report owes a great deal to assistances rendered by the USAID office in Korea, which is virtually the only original source of aid data, and in particular to Mr. Morley H. Gren, the former controller of USAID to Korea for his sincere cooperation, and Mr. Doo Je Woo, deputy controller of USAID to Korea, who is also an eye-witness on U.S. economic aid to Korea, for his unremitting assistances and professional consultation,

and Mr. Chul Ho Kim, program specialist at USAID for his professional assistances.

The report also owes to Prof. Anne O. Krueger of University of Minnesota who provided the aid summary data prepared by AID head office in Washington, D.C., and Mr. Harold H. Koh who was then a research assistant at HIID, preparing a preliminary survey on the U.S. economic aid to Korea for the period of 1945 to 1955. Thanks are also due to Mr. Keun Kyung Lee of Financial Planning Division of Economic Planning Board for the data on capital inflow, and Mr. Moo Yong Kim of Foreign Capital Division of Economic Planning Board for the data on P.A.C., and to Mr. Dong Il Byun, research assistant at KDI, who rearranged the raw data from the statistical files at the USAID office in Seoul.

Finally, this report owes to Mr. Kwang Suk Kim, Director of 1st Research Department of KDI for his supervision, and to Mr. Suk Tai Suh, senior fellow at KDI and his three research assistants, Mr. Jung Mo Kang, Mr. Il Ho Suh, and Mr. Byung Sik Yoon, who have actually undertaken all the toils in preparing this report, and by far Miss Yong Min Rhee for her excellent typing of the manuscripts several times as the data had to be revised several times.

PART I

INTRODUCTORY NOTES

1. Introduction

The present statistical report is divided into two parts; the first part provides the statistical data on foreign economic aid to Korea, and the second part on foreign capital inflow into Korea, for the period of 1945-75. The dividing line between foreign aid and foreign capital is not easy to draw since many foreign capital loans, particularly from the international lending institutions for development such as the world Bank contain the so-called grant elements. In this report, however, all the unilateral transfer of capital on a grant basis and long-term capital loan on a gratuitous basis such as Development Loan, whether in the form of physical goods or financial form, are treated as foreign economic aid while all foreign capital loans either on commercial terms or on "soft" terms such as those provided by the international development lending institutions and foreign investment are classified as foreign capital inflow.

The aid included in this volume covers only the official aid to Korea, which excludes all the civilian donations and private gifts channelled through foreign voluntary organizations, such as CARE. The main reason for excluding these private assistances is not that their significance is not appreciated but that the relevant data are not readily available at the moment.

The data on foreign capital inflow excludes short-term foreign loans with maturity of less than 3 years because most of these are merely

the trade credit for the balance of payments considerations.

The foreign economic aid to Korea started in 1945 when the U.S. Army Military Government (USAMGIK) was established in Seoul to fulfill the objective of establishing a free and independent nation in Korea after a due course of preparation according to the Cairo Declaration of 1943 and the Potsdam Declaration of 1945. Strictly speaking, the foreign economic aid to Korea should include all the goods and services including technical assistance provided on a grant basis not only by the foreign governments but also by foreign voluntary organizations. Unfortunately, the data on the assistance provided by the voluntary organizations are not available at the moment although their contributions in the Korean society should not be neglected.

Included in the foreign aid data is the data on counterpart fund operation which is composed of (1) local currencies directly allocated to the government organizations for supporting government programs and (2) of local currencies loaned out to the private sector of the economy. The counterpart fund is generated by sales in the local market of the commodities granted on a grant basis, the use of which is determined by mutual agreement between the government of donor country and the government of receiving country. The counterpart fund system originates from the Foreign Assistance Act of 1948 under which ECA (Economic Cooperation Administration) administered economic aid to Korea and the Mutual Security Act of 1953.

The foreign aid data covered in this volume represents mostly the

unilateral aid flow from the U.S. to Korea except CRIK and UNKRA to which many countries under the U.N. auspice contributed during the Korean war. However, the U.S. economic aid constitutes the bulk of the major portion of the aid flow for the whole period as is apparent from the fact that CRIK is overshadowed by the U.S. portion of 92% and UNKRA of 65%.

In this report we provide three sets of data on all the official aid by source, years and types: (1) the set based on data provided by AID head office in Washington, D.C., (2) the set based on data provided by USAID in Seoul, and (3) the set based on data provided by the Bank of Korea.¹ There are some discrepancies in the total amount of aid by year, as well as by types, among the three sets of aid data. However, the statistical discrepancies are small negligible for most types of aid, and the major trend in the aid flow is not shattered by the discrepancies. Therefore, the statistical discrepancies are considered to be of minor importance to our analysis. In the meantime we will continue our efforts to revise the data as new basis for reconciliation arises in seeking out the more correct one. Furthermore, we will also continue to look for private donations and civilian channels in order to make the present volume a more complete one.

Foreign capital loans investment started to arrive in Korea in the early part of 1960's in a time when the unilateral transfer of grant-aid

¹ Each set covers slightly different time periods and differs in content due to different aid classification.

declined sharply. The foreign capital in this report is divided into (1) loan part and (2) investment part, and the loan part is further sub-divided into public loans and private (or commercial loans) by sectors and by years. The debt service is also profiled in separate tables.

Another important capital inflow was the Property and Claim (P.A.C.), which was not an aid but a collection of rightful claim compensating for all the national sacrifices incurred on the lives and property of the Korean people by the Japanese government during the occupation period of 36 years (1910-1945). Because of the unfortunate past relationship between Korea and Japan, a normal diplomatic relationship was postponed although a friendly diplomatic and economic cooperation between the two neighboring countries was deemed rational and inevitable. However, on June 22, 1965 the two governments finally signed the agreement on "the Settlement of the Property and Claim and Economic Cooperation Between the Republic of Korea and Japan". With signing of the agreement a normal diplomatic relationship between the two countries began, and economic cooperation started at both government and civilian level.

The settlement of the P.A.C. was based on the agreement that the property and claim owing to the people of the Republic of Korea by the Japanese government by the date of August 15, 1945 was estimated at \$300 million, and this amount was to be paid to the government of Korea in grant for 10 years of time period, and at the same time \$45 million was to be paid to the Japanese government as rightful claim against the

Korean government. The agreement further specifies that \$200 million loan (7 year grace period and 13 years payment period with annual interest rate of 3.5%) was to be loaned out to the Korean government in 10 years of time period as an act of the first economic cooperation between the two governments.

The P.A.C. was used in three different categories. The first was the use of \$300 million grant for developing agriculture, forestry and fishery as well as the key industries such as Po Hang Steel plant and import of the related science and technology for the heavy and chemical industries. The grant was mainly used for import of capital equipments and raw materials for the above purposes. The second was the use of \$200 million loan for developing the social overhead capital facilities such as construction of the Soyang River Multipurpose Dam and Seoul-Busan Express way construction, and the long-term key industry projects such as Po Hang Steel Company, and many others. The third was the won currency fund which was composed of the sales revenue of the equipments and raw materials imported by the P.A.C. grant. The won currency fund was used for development of the related projects similar to the above areas.

The first P.A.C. grant and loan started to arrive in 1966 and the last portions arrived in 1975. The tables V-1 through V-3 provide the yearly and sectoral expenditures of the P.A.C. fund.

In this report the data on foreign capital inflow is self-explanatory, requiring no additional comments. However, the data on aid is somewhat controversial to the extent that the amount of aid by each type, period and source does not match each other among the three different sources,

namely the AID head office in Washington, D.C., the USAID to Korea, and the Bank of Korea. Furthermore, the chronology of aid administration in Korea is also complicated. Therefore, in the next section we provide a brief outline of aid administration in Korea and in section 3 we provide some statistics that clarifies the statistical discrepancies among the three sets of data source. In Part II, we provide first the foreign aid statistics by three data sources, namely (1) the AID(Washington), (2) USAID to Korea, and (3) the Bank of Korea. Then, we provide the statistics on foreign capital loan and P.A.C. fund. In the Appendix, we provide a detailed data on Supporting Assistance Project and Non-Project, and on the Counterpart Fund Operation.

2. Brief Outline of Aid Administration in Korea

The first U.S. aid to Korea began on September 9, 1945 when the U.S. Army XXIV Corps, under the command of General John R. Hodge, began the United States Army Military Government in Korea (USAMGIK). The first U.S. aid to Korea was GARIOA (Government and Relief in Occupied Area), the main objective of which was (1) prevention of starvation and disease, (2) boosting of agricultural output and production, and (3) massive provision of commodity goods to narrow the gap between the supply and massive demand for goods. About ninety percent of aid was in the form of commodities, with only 10 percent going to rehabilitation efforts.¹⁾ With the establishment of Korea's first Republic on August 15, 1948, the USAMGIK was dissolved and so was the GARIOA discontinued.

From 1949 the foreign economic aid arrived in Korea through the ECA (Economic Cooperation Administration) in accordance with the Foreign Assistance Act of 1948. The FAA of 1948 was enacted to help the reconstruction and stabilization of living standards in the war-torn economy in the European nations and the rest free world. The first ECA mission in Korea arrived in Korea in January, 1949, and the content of aid was mainly in the form of capital equipments, raw materials and final consumer goods.

On December 10, 1948, the government of the Republic of Korea and that of the United States of America signed the ROK-US Agreement on Aid. This agreement, similar to the ECA agreements with Western European countries, required the Korean government to follow certain stable economic

1)

See W.D. Reeve, The Republic of Korea : a Political and Economic Study, London : Oxford University Press, 1963, p. 105.

policies, which included balancing its budget, regulating foreign exchange, effectively disposing of the vested properties, establishing a reasonable exchange rate, etc. The agreement also established a "counterpart fund" account in the Bank of Chosun (the later Bank of Korea) to make use of the won equivalents of the sales portion of the U.S. aid commodities for purposes mutually agreed upon with the United States Government.

As the cold war between the West and East became intense in the post-W.W.II period, the U.S. Congress enacted the Mutual Security Act of 1949 to provide defense assistance to the NATO countries in Europe as well as to other friendly nations. Consequently, an agreement was signed on "the Mutual Defense Assistance Agreement" between the government of the Republic of Korea and the government of the United States of America on January 26, 1950, and the first military aid to Korea started in 1950.

However, with outbreak of the Korean War on June 25, 1950, the economic aid by ECA was dis-continued. At the same time the U.N. Security Council adopted a unanimous resolution on June 27, 1950, calling for immediate assistance to Korea by the member countries, military as well as economic, to repel the Communist aggression and to recover peace in the Korean peninsula. On July 7, 1950 United Command under the Command of the U.S. forces in Korea was organized to provide the military and economic assistance to Korea, and the U.N. Security Council decided to provide CRIK aid (Civil Relief in Korea) on July 31, 1950. At the same time all the economic aid that had been previously provided by ECA was transferred to the commander of the U.N. forces in Korea, and ECA aid was continued through SEC (Supplies Economic Cooperation) until May, 1953.

By October of 1950, hostility in Korea seemed to be near to its end, and United Nations Korean Reconstruction Agency (UNKRA) was established in the 5th U.N. General Assembly to provide economic aid to rehabilitate the economy to the pre-war level. However, the war was prolonged by massive influx of Chinese Communist volunteers by November of 1950, and UNKRA aid which was originally aimed for the post-war reconstruction purpose was carried out for economic relief purpose during the War.

For administering CRIK aid, the United Nations Civil Assistance Command in Korea (UNCACK) was set up in 1950, and UNCACK was changed into Korean Civil Assistance Command (KCACK) to carry out the CRIK aid in July, 1953. The CRIK was composed of two different sources ; (1) the Supplies for Korean Organization (SKO) which was civilian relief aid provided by the U.S. Department of Army, and (2) the Supplies, United Nations (SNU) which was also civilian relief aid provided by the member countries of UN and other voluntary aid by non-member countries.

As the hostility in Korea gradually leveled off in 1952, the Combined Economic Board (CEB) was created on July 24, 1952 as a result of the decision mutually agreed upon by the so-called "Meyer Agreement" which was signed between Mr. Clarence E. Meyer, the then U.S. diplomatic minister in Japan, representing the U.S. government and the government of the Republic of Korea. The "Meyer Agreement" was intended to provide a formal agreement between the two governments on the continued military support to the U.N. forces stationing in Korea as well as to provide continued economic assistance for relief and economic reconstruction.

On July 27, 1953 the U.S. government changed the aid administration by redesignating the Mutual Security Agency (MSA) to Foreign Operations Administration (FOA). At the same time President Eisenhower appointed Mr. Tylor Wood who was the deputy director of FOA to the post of head of Economic Coordinator for Korea (OEC) whose official function was a coordinating role and an economic advisory role for FOA as well as for the Korean government.

On July 1, 1955, the FOA was redesignated as International Cooperation Administration (ICA), and the Coordinator of OEC was appointed as head of ICA mission to Korea. On July 1, 1959, the OEC was changed to U.S. Operations Mission (USOM). to the Republic of Korea. The UNKRA was created to deal with the possibility of united Korea while the FOA to deal with the possibility of a united Korea while the FOA to deal with the reality of a divided Korea with need for its own defense force. With the OEC functioning as coordinator between the donor country government and the receiving country government, the UNKRA, CRIK and FOB aid became more effectively administered through the CEB.

The two war time agencies, UNKRA and KCAC were used as operational arms of the FOA, with the FOA serving a central-coordinating and funding source. UNKRA programmed its own funds and thus provided technical assistance and program support to the FOA in the areas of industry, mining, education, vocational training, fisheries, irrigation, forestry, flood control, housing and hospitals. KCAC, on the other hand, programmed CRIK funds, and operated in the areas of transportation, communication, public works, power, agriculture, public health, and social affairs. ¹

¹ UN Command, Report by the Office of the Economic Coordinator for Korea, FY 1954. Prepared by the OEC Program Office, Aug. 6, 1954. See also, Harold H. Koh, "The Early History of U.S. Economic Assistance to the Republic of Korea, 1945-55, " a paper prepared for Harvard Institute for International Development, 1975.

AFAK, the third arm of the FOA, engaged in two types of projects: construction (of schools, churches, etc,) in local communities in cooperation with units of the ROK army forces as project sponsors, and civilian medical aid. The FOA itself was later redesignated as the ICA, a semi-autonomous agency of the Department of State with a mission in Seoul. Thus, the operations of the multiple agencies were separated but simultaneously united under the direction of OEC.¹

The main stream of U.S. economic aid to Korea for the post-war reconstruction period originated from the Mutual Security Act of 1954, and the aid by MSA of 1954 was administered through ICA since 1955. The MSA of 1954 was composed of (1) military aid and (2) economic aid. This Act aims at providing assistance, military as well as economic, to most of the free world nations which faces a continuing threat of communist aggression. The economic aid of MSA of 1954 was composed of (1) Defense Support which includes Supporting Assistance Project and Non-Project, and (2) Development Assistance which includes Technical Cooperation and Development Loan provision.

The supporting assistance project was mainly composed of investment goods for specific projects such as fertilizer plant, and the supporting assistance non-project was composed of non-investment goods such as raw materials and finished consumer goods. The DLF was created in 1957 according to the 1957 revision of MSA, and was designed to assist in development of resources and enhancement of productive capacity in the free world nations. The DLF is used as a long-term loan with favorable terms of

¹ Ibid.

repayment and almost negligible rate of interest. The receiver of DL fund is not confined to any specific entity. Either a private firm or the government can apply for it.

Another important aid legislation enacted by the U.S. Congress was the Agricultural Trade Development and Assistance Act of 1954 (P.L. 480). The Act is designed to increase the consumption of U.S. agricultural commodities in foreign countries, to improve the foreign relations of the U.S., and for other purposes. The Act provides the authority to the President to negotiate and carry out agreements with friendly countries to provide for the sale of agricultural commodities for dollars on credit terms or for foreign currencies. For carrying out this authority the Commodity Credit Corporation was authorized to finance the sale and exportation of agricultural commodities. The Act is, as amended in subsequent years, composed of Title I which is composed of sale and loan, as described above, and of Title II & III. The Title II & III provides the authority to the President to determine and furnish agricultural commodities to meet famine or to provide relief in the distress areas of the free world. The aid of agricultural commodities by PL 480 began to arrive in Korea by 1956 (FY).

The 1957 amendment of PL 480 provides the Cooley loan fund which is funded up to 2.5% of the Title I sales of agricultural commodities in local currency. This loan fund is to be used for loan purpose to those U.S. firms which are engaged in developing trade related activities in the receiving country, and the terms of loan are the same as those existing in the receiving country.

Another important legislation enacted by the President Kennedy was the Peace Corps Plan which provides the training of about 5,000 members and sending them to developing countries in the free world for purpose of assisting economic and social development of the developing countries including education in the field of English language, science and adult education, health and sanitation, and village development.

The ICA was changed to Agency for International Development (AID) in 1961 according to the Foreign Assistance Act of 1961, and the USAID to Korea took over the ICA aid administration in 1961. The AID aid is composed of Supporting Assistance Project and Non-Project, Technical Cooperation, Defense Support and Development Grant Project, PL 480 Title I Sales and Loan, Title II & III, Development Loan Fund and the Peace Corps.

Korea received various forms of economic aid since 1945, and the basic functions of economic aid changed chronologically, reflecting both changes in the foreign economic policies of the donor country, largely the United States, and changes in the socio-economic and political conditions of the receiving country, Korea. Therefore, the period of 1945-75 in this report is divided into 5 sub-periods according to the basic functions, objectives and types of each aid administration. This way of dividing the aid period by the above chronological order roughly conforms the framework in which the basic functions and objective of aid fit together.

The five sub-periods are; (1) the USAMGIK period (U.S. Army Military Government in Korea) (1945-8) and the GARIOA (Government and Relief in

Occupied Area) and UNRRA (United Nations Relief and Reconstruction Agency) and other civilian channels, (2) the first Republic before the Korean war (1948-50) by ECA(Economic Cooperation Administration) of FAA(Foreign Assistance Act of 1948), (3) the Korean war (1950-53) by SEC(an extension of ECA during the war period), CRIK (Civil Relief in Korea), UNKRA (United Nations Korean Reconstruction Agency), and AFAK(Armed Forces Assistance to Korea), (4) Post-war reconstruction period (1954-60) by CRIK, PL 480, and ICA of MSA(Mutual Security Act of 1954), and (5) rapid industrialization period (1961-to present) by AID (Agency for International Development) of FAA(Foreign Assistance Act of 1961).¹

As the above illustration of various administrations in a chronological setting may look impressive, a further complication arises when each aid administration is identified by its objectives. Broadly viewing, foreign aid to Korea may be divided into two objectives: the aid for relief and stabilization of the living standards, and the aid for economic reconstruction and industrial growth. In a sense the two are mutually complementary, i.e., one cannot do without the other, although the latter is a more permanent means to alleviate poverty and achieve economic growth while the former a more temporary measure. The former period, then, includes the period of 1945-48, the period of 1948-50, and the period of 1950-53, and the latter period includes the period of 1954-60, and the period of 1961-to the present. The latter period may also be divided into the stabilization and reconstruction period of 1954-60, and the rapid industrialization

¹ Nam Won Suh, Foreign Economic Aid: In Theory and Practice, Seoul: The Korea Research Center, 1963.

See also, Harold H. Koh (1975).

period of 1961-to the present.

The aid may also be classified by objectives of each aid administration: (1) aid for relief includes GARIOA (1945-48), UNKRA (1945-48), CRIK (1950-53) and other civilian channels for charitable gifts, (2) aid for economic development and defense support in an international and political policy framework includes FAA of 1948 and ECA (1948-50), MSA of 1954 and ICA (1954-60) and FAA of 1961 and AID (1961-to the present) and PL 480 (1956-to the present), (3) aid for reconstruction by U.N. and multi-lateral efforts includes AFAK (1954-57), UNKRA (1951-58) and SEC (1950-53), and (4) aid for academic and research development.

The foreign economic aid to Korea as is illustrated by the above complicated chronological setting is no more complicated when it is arranged by country of origin. In a nutshell the U.S. economic aid constitutes the bulk of the major portion of aid for the whole period as is apparent from the fact that all the aids to Korea are provided by the U.S. except UNKRA, UNRRA, and CRIK. Even CRIK is overshadowed by the U.S. portion of 92% and UNKRA is also overshadowed by the U.S. contributions of 65%.¹ Furthermore, the total aid received on arrival basis from CY 1954-60 amounts to \$1.8 billion, of which only 4% belongs to UNKRA aid, 8.4% to PL 480 and all the rest to ICA.²

The counterpart fund is used only when an agreement is reached on the use by the government of donor country and the government of receiving

¹ Harold H. Koh. (1975).

² Nam Won Suh, Foreign Economic Aid : In Theory and Practice, (1963).

country as in the following excerpt:

"An agreement to place in a special account amounts of local currencies equivalent to the assistance made available on a grant basis. These local currency accounts were to be utilized only by mutual agreement with the administration in consultation with the National Advisory Council, for purposes of internal financial stabilization, productive investment and the development of new resources, and for local currency expenses of the United States incident to the Program." ¹

Counterpart Fund is in general defined as the sales proceeds of the grant-aid commodity, including the surplus agricultural commodity by U.S. Public Law 480. However, in the accounting papers of USAID in Seoul, the Counterpart Fund includes only a part of the grant-aid, that is all of the Supporting Assistance Non-Project and the portion apportioned to the private sector of the economy in the Supporting Assistance Project & Technical Cooperation, Defense Support & Development Grant Project.

Most of the Counterpart Fund is used by the Korean government except a few percentage of it (less than 5% by law) which is appropriated for the operational expenditures of the U.S. government in Korea. The Fund is used either for private investment projects channeled through the Korea Development Bank or as an additional revenue for general expenditures of the government, in which case it would have an effect to finance the deficit spending without increasing the domestic money supply. Therefore, the use of Counterpart Fund may act as a counter-inflationary force through its deflationary effect. The Fund may also be used as an additional reserve asset for the central bank, in which case its use

¹ Raymond F. Mikesell, United States Economic Policy and International Relations, New York, McGraw-Hill, 1952, p. 251.

would have an expansionary effect. However, its use as a central bank reserve asset is limited by the requirement of approval from the National Assembly.

3. Statistical Discrepancies in the data on Foreign Economic Aid

The first set of data based on AID in Washington, D.C. provides all the U.S. economic aid by types and period in U.S. fiscal year basis for the period of 1946-73 as shown by table I-1 and 2. The total economic aid including all the grants and loans of all kinds for the period of 1946-73 amounts to \$5,655.5 million, and this amount is subdivided into five sub-periods, i.e., 1946-48, 1949-52, 1953-61, 1962-65, and 1966-73. The same total and sub-totals are further classified by types of aid such as GARIOA, CRIK, AID, PL 480, UNKRA, Surplus Property, Peace Corps and others.

The second set is based on the set of aid data released by USAID in Seoul, Korea, which covers the period of 1954-75 in calendar year basis and in U.S. fiscal year basis as shown by tables II-1 through 5. The original USAID set is in fiscal year basis as shown by tables II-3 and 5. The types of aid include Supporting Assistance Non-Project, Supporting Assistance Project and Technical Cooperation, Defense Support & Development Grant Projects, Technical Support, PL 480 Title I, Title II & III, and Development Loan. The total amount for the period of 1954-75 is \$4,708,530,749, and this total is subdivided into four sub-periods, i.e., 1954-61, 1963-65, 1966-73, and 1974-75, and is regrouped in three main elements, AID, PL 480 and DL fund.

The third set is based on the set of data published by the Bank of Korea, which covers the period 1945-75 in calendar year basis. The BOK

Table 1 Comparison of Aid Data by Three Sources

Units: Million U.S. Dollars

	AID (Washington) (FY Basis)	USAID (Korea) (CY Basis)	BOK (CY Basis)
GARIOA	292.0	-	502.1
F.L.C.	24.9	-	24.9
CRIK	420.2	-	457.4
AID Grant	2,619.8 (1946-73)	2,361.9 (1954-75)	2,576.9 (1949-75)
		Supporting Assistance	ECA (1949-53) 109.1
		Non-project	FOA (1953-54) 33.0
		Supporting Assistance	ICA (1953-60) 1,587.3
		Project & Tech. Coop	AID (1961-75) 847.5
		& Defense Support, Dev.	
		Grant Project	494.8
		Tech. Support	30.9
		Sub-total	2,576.9
		Sub-total	2,361.9
AID Loan	478.7	-	-
DL Loan	-	631.7	-
UNKRA	122.2	-	122.1
Peace Corps	12.4	-	-
Others	8.5	-	-
PL 480 Title I Sale	632.4	777.6	795.7
Loan	541.3	523.3	-
Title II & III	503.1	414.1	-
Total	5,655.5	4,708.6	4,479.1

set of data gives \$4,479,167 thousand for the period of 1945-48, 1949-52, 1953-61, 1962-65, 1966-73, and 1974-74, and is classified by types of aid. The types of aid in the BOK set include GARICA, F.L.C., ECA, FOA, CRIK, ICA, PL 480, UNKRA, excluding DL or AID loan and PL 480 Title I loan and Title II & III.

The DL loan data are excluded from the BOK set, which may amount to about \$500 million, and also the PL 480 Title I loan and Title II & III are excluded from the BOK set, which may amount to roughly \$1,000 million. And, also the BOK figure is much larger than the AID figure for GARICA and CRIK. The USAID (Korea) set covers only the period of 1954-75, and even the aid in this period is classified in the types different from other sets. However, a rough comparison among the three sources is made in table 1.

As shown in table 1, the AID (Washington) total of \$5,655.5 million is the largest among the three totals although it could be smaller if the appropriate amounts for the missing parts in each set are added. For instance, if we add \$500 million for the DL loan part and \$1,000 million, the BOK total could be as high as \$6 billion. Also, if we add \$122 million for the missing part of UNKRA and about \$800 million for the missing parts of GARICA, F.L.C. and CRIK to the USAID total of \$4,708.6 million, the USAID total could be \$5,630.6 million.

So far, we have neither been able to make a compromise for the differences among the three sets nor have we been able to find the underlying reasons for the discrepancies among the same types of aid in each set.

However, we may take comforts from the fact that the main trend as well as the rough size of aid by total sum as well as by sub-totals do not seem to be blurred by the discrepancies except a few instances like GARIOA. Furthermore, each type of aid by each source is finely disaggregated and is fairly accurate as to give a good idea about the major trend of each component by type of aid.

We do not rule out the possibility that some minor statistical discrepancies between the present edition and the data possessed by the head office of AID in U.S.A. occurred as some of the original data at USAID in Seoul was transferred to the U.S. without any trace at USAID office in Seoul during the elapse of 20 years of time. Therefore, a further revision of the present volume is possible as the more accurate and new sources of information may be found in the future.

Now an important question arises as to what source of data should be used for different periods and different types of aid. For the early period, 1945 to 1953, the following BOK data provides a fairly accurate breakdown: GARIOA, FLC, ECA, FOA, CRIK and UNKRA. However, PL 480 of the BOK set covers only Title I sales part and even that is not reliable. For the post-Korean war period, the USAID data are more reliable, and the project and non-project assistances are all broken down to a detailed sectoral level from 1954 to 1975. Also, the USAID set provides the most reliable data on PL 480 Title I sales and loan and Title II & III, and on DL loan. Also, the USAID data on counterpart fund operation is also the most reliable.

For A detailed breakdown of the U.S. project and non-project assistance and the counterpart fund operation by specific project are provided in Appendices at end of the tables.

In order to provide a brief summary of the size and types of aid data included in this report, the following additional remarks are prepared for tables I-1, I-2, II-1, II-2, II-3, and III-1, for each data source.

(I) AID, Washington, D.C.,

Table I-1 Summary of U.S. Aid Received: FY 1946-1973

This table gives a comprehensive summary of U.S. economic aid to Korea from 1946-1973 (U.S. fiscal year basis) and is classified by types of aid and by five sub-periods. The total amount is \$5,655.5 Million U.S. dollars. And this total is classified by GARIOA, Surplus Property (F.L.C.), CRIK, AID loan and grant, PL 480 Title I loan and sales, Title II, UNKRA, Peace Corps and others, and is subdivided into five sub-periods, 1946-48, 1949-52, 1953-61, 1962-65, and 1966-73.

Table I-2 Summary of U.S. Aid Received: FY 1946-61

This table gives a yearly summary of U.S. economic aid to Korea for the period of 1946-61, during which U.S. economic aid to Korea played the most vital role in her economic recovery period, and is classified by the same types of aid as in the above classification. The total amount is \$3,245.9 million U.S. dollars, accounting for about 57.4% of the total for 1946-73, and about 78.1% of the AID grant total for 1946-73.

(II) USAID in Seoul

Table II-1 AID Financial Expenditures for Korea Programs from
calendar year 1954 through 1975 (As of December 30, 1975)

This table gives the post-Korean War summary of U.S. economic aid to Korea by year, classified by the following types: 1) Supporting Assistance Non-Project, 2) Supporting Assistance Project & Technical Cooperation, Defense Support & Development Grant Project, 3) Technical Support, 4) PL 480 Title I Sale and Loan, Title II & III, and 5) Development Loan. The table shows that the Supporting Assistance Non-Project, which are mainly composed of consumer goods and related material goods for final consumption, decreased rapidly in 1960's and ceased in 1972 while the Supporting Assistance Project & Technical Coop., Defense Support & Dev. Grant Project, which are mainly investment goods, rose in late 1950's and then declined slowly in 1960's and 70's. At the same time Development Loan started in 1960 and continued to become the major portion of the total aid in 1960's and 70's.

Table II-2 Supporting Assistance Project and Tech. Cooperation, Defense Support & Development Grant Project (As of June 30, 1975)

This table gives a summary of Supporting Assistance Project & Technical Cooperation, Defense Support & Development Grant Project for calendar year of 1954 through 1975, and is classified by the following project sectors: 1) Agriculture, 2) Industry and Mining, 3) Transportation, 4) Labour, 5) Health and Sanitation, 6) Education, 7) Public Administration, 8) Commodity Development, and 9) General Miscellaneous. The aid in investment goods was allocated to various sectors, and the detailed breakdown by specific project is shown in Appendix 1.

Table II-3 AID Financial Expenditures for Korea Program from FY 1954 through 1975 (As of Dec. 31, 1974)

This table gives a summary of U.S. aid in U.S. fiscal year basis, and the total as well as sub-totals differ slightly from the CY total of Table II-1 and 2. The slight difference occurs as a by-product of the conversion procedure from FY basis to CY basis and due to the time period covered that differs slightly from each other.

(III) Bank of Korea

Table III-1 Summary of Foreign Economic Aid received

This table gives a summary of foreign economic aid received for the period of 1945 through 1975 in calendar year basis. The total amount of \$4,479 million U.S. dollars is classified by the following types of aid: GARIOA, FLC (Foreign Liquidation Committee of Surplus Materials), ECA, FOA, CRIK, ICA, AID, PL 480 Title I sales, and UNKRA, excluding any DL or AID loan and PL 480 Title I loan and Title II & III, and others such as Peace Corps.

Notes : 1) A portion of proceeds from sales of surplus agricultural commodities imported under the U.S. Public Law 480 used by the U.S. Gov't cannot be regarded as foreign aid received. But for convenience it is included here to show the total imports under the same law PL 480 Title I (Sale).

2) Including technical assistance and administrative expenses of the aid agency.

3) F.L.C. denotes Foreign Liquidation Committee of Surplus Materials during 1947.

Appendix 3 Summary of Counterpart Details of
AID Funded Government Projects
(CY 1954-61)

			Unit in thousand Won
Project Title	Ministry	Period	Won, Programed Approved and Released
00. Direct Military Support			20,449,953
National Defense Special Account	MOND	1954-56	2,586,276
Military Budget Support	MOND	1958-61	17,863,677
10. Agricultural Resources			
11. Research, Agricultural Education and Extension			482,930
Agricultural Research	MOAF	1956-60	14,473
Farm Soil Testing Service	MOAF	1956-60	3,936
Agricultural Research Improvement	MOAF	1957-59	4,041
Agricultural Extension Development	MOAF	1956-60	278,712
Agri. Research & Extension Development	MOAF	1957-59	181,768
12. Land and Water Resource			6,161,385
Forestry Erosion Control	MOAF	1956	35,950
Flood Control	ONC	1956-60	1,032,752
Irrigation Land Reclamation	MOAF	1956-58	1,952,800
Upper Watershed Technical Assistance	MOAF	1956-60	3,250
Forest Erosion Control	MOAF	1956-57	220,750
Upper Watershed Soil & Water Construction	MOAF	1957-58	247,180
Land and Water Use & Improvement	MOAF	1958-60	2,656,253
Rivers	MOAF	1954	12,450
13. Crop and Livestock Development			260,824
Seed Development	MOAF	1955	525
Livestock & Veterinary Rehabilitation	MOAF	1961	11,011
Sericulture Rehabilitation	MOAF	1958	1,955
Limestone Crushing Plant	MOAF	1958	11,300
Specialty Farm Enterprises	MOAF	1960	4,352
Seed Treatment	MOAF	1956-58	200
Livestock & Veterinary Improvement	MOAF	1950-60	65,654
Crop & Soil Improvement	MOAF	1957-59	115,368
Soil Management & Improvement	MOAF	1957-60	4,345
Crop Diseases, Insect & Pest Control	MOAF	1957-62	10,260
Sericulture Development	MOAF	1957-61	32,854
Agricultural Rodent & Pest Control	MOAF	1958-62	3,000
